

GLOBAL HEALTH RESEARCH ON NOVEL PATHS

EXPERIENCES FROM INITIATIVES BY GERMAN PUBLIC FUNDING

As a leading international donor and a country with strong research, Germany has started several initiatives for strengthening research in Global Health and linking it to practice by establishing new platforms. Global Health research is one of the pillars of the new German Global Health Strategy.

Three recent initiatives will be presented in this session:

Discussion of

- 🗨️ New approaches in connecting Global Health researchers nationally and internationally
- 🗨️ Funding of interdisciplinary research
- 🗨️ Early career support
- 🗨️ Intercontinental joint supervision and interaction with politics
- 🗨️ Equity in international collaboration

Objectives

- ➔ Debate best practices for making Global Health research more equitable, interdisciplinary, international and action-/solution-oriented
- ➔ Provide arguments to convince governments for appropriate support of Global Health Research
- ➔ Create a space and opportunity to build connections with similar networks and institutions

Facilitators

Leah Goodman
GLOHRA
Secretariat at
Charité, Germany

Dr. John Amuasi
Kwame Nkrumah
